

X1 SLIM

Bike to Bike Radio Communicator

ChatterBox!™

 **Bluetooth**®

The most versatile communicator on the market just got better!

Introducing the ChatterBox! X1 SLIM featuring bluetooth technology. Predecessor to the X1 bluetooth model the SLIM is drastically smaller and lighter in size but packs a huge punch. There just isn't anything else out there like it.

Features include:

- Almost half the size and weight from the past X1 model
- Make/answer phone calls listen to your music and hear your GPS directions via wireless Bluetooth technology with A2DP
- AVRCP remote control allowing you to control your music features like forward/reverse music track, volume up/down and pause/play
- Industry leading 5 mile range when communicating within 22 channels and 38 sub channels
(No more need to be in line of site)
- Capable of communicating among an unlimited amount of riders in your group
(No hassle of having to switch back and forth while being limited to talking to only one rider at a time.)
- New hands free voice activation technology featuring TOT processing
- Push to talk functionality that is compatible with an optional wireless handle bar mount push to talk button
- New multi function Hi-fidelity noise suppression headset with detachable speaker capability
- Built in Intercom for riding with a passenger*
- FM radio w/ scan and 10 presets
- Lithium Ion rechargeable battery with 8-10 hours talk time 20 hours standby
- USB style wall charger
